A: Your short answer is yes, there is a way to use XFORCE with Autocad. Look here: The error message you see is likely because the site you are trying to install the "key" from doesn't match the version of Autocad you are using. My guess would be that you are using either AutoCAD 2018 or AutoCAD Map 3D 2010. If so, you cannot use XFORCE to upgrade from 2017 or 2010 to 2018. Not sure if this is a licensing issue, or if you are only offered upgrades to other products, but I would assume it's a licensing issue. Q: C# get the length of a string without using the.Length property Possible Duplicate: How to get string length with LINQ? Is there a way to get the length of a string in C# without using the.Length property. I don't want to use the.Length method. It's just the simple thing. For example, I want to use string.replace(".", "") to get the length of the string, but the.Length function is not supported. A: Use a Linq extension method: public static class Extensions { public static int LengthOf(this string str) { return str.Length; } } Use it like so: string stringToFind = "....."; string toFindLength = stringToFind.LengthOf(); A: It is possible with some ugly workarounds string s = "yourString"; int lengthOfString = s.Substring(s.Length - 1).Length + 1; and this should work for any string with odd length. A: If you want to get the length of a string without using the string.Length Property, you can use this code snippet: int lengthOfString = string.GetString(string.Length - 1, string.Length).Length + 1; Synthesis of 3-Methoxycarbonyl-5-methyl-2-methylene-1H-pyrrole-1-carbonitrile, Its Structural Characterization
